The BIG Picture

Purpose

- Exchange ideas and share your innovations
- Become a part of the change education needs
- Take ideas back to implement the change you want
- Meet practitioners from Across the GLOBE

The Big Picture Leadership Training Conferences on Creating High Performance Education Systems being held in Delhi, Pune and Bangalore are all set to create the global conversations that lead to meaningful and effective change.

We want to learn how the top performing countries of the world run their education systems. This includes Western countries such as Finland, Canada, Netherlands, New Zealand and Australia and Asian countries such as Singapore, Hong Kong, South Korea and Japan. How have these countries implemented their own innovations to make them academically the strongest countries in the world with very few drop outs and majority of their children excelling? What is it that they do that puts them ahead of others? Can their experience be translated into action within the Indian context? How?

From macro level directions to micro level and innovative teaching processes, the participants can go back empowered with both a new vision and practical steps for its implementation.
